

VERSION #1

ANNCR:

A long, long time ago, the earth was ruled by dinosaurs. They were big, so not a lot of people went around hassling them. Actually, no people went around hassling them because there weren't any people yet, just the first tiny mammals, who were only moderately annoying.

Then one day, a giant meteorite struck the earth, and the dinosaurs all disappeared.

DINOSAUR:

Whazzat? Did you say something?

DINOSAUR #2:

No.

DINOSAUR:

I could swear you said "giant meteorite."

ANNCR:

To this day, nobody knows for sure what really happened...

SUPER: "Brooklyn. 65 Million Years Ago."

METEORITE STREAKS DOWN, EXPLOSION FLARES TO WHITE

ANNCR:

But what if the dinosaurs weren't destroyed? What if the impact of the meteorite was so great, it created a parallel dimension, where the dinosaurs continued to thrive. And... evolve.

And -- what if they found a way back?...

VERSION #2

ANNCR:

A long, long time ago, the earth was ruled by dinosaurs. They were big, so not a lot of people went around hassling them. Actually, no people went around hassling them because there weren't any people yet, just the first tiny mammals, who were only slightly annoying.

Basically, life was good.

DINOSAUR

Let's go down to the tar pit and hang out.

DINOSAUR #2

Okay.

Then something happened. And the dinosaurs all disappeared.

METEORITE STREAKS DOWN, EXPLOSION FLARES TO WHITE

ANNCR:

A giant meteorite struck the earth. But what if the dinosaurs weren't destroyed? What if the impact of that meteorite created a parallel dimension, where the dinosaurs continued to thrive. And... evolve.

And -- what if they found a way back?...

I'll tell you what. We'd be in big trouble...

VERSION #3

ANNCR:

A long, long time ago, the earth was ruled by dinosaurs. They were big, fearless, and kind of stupid. Nothing really bothered them. Not even the first tiny mammals, who they considered only slightly annoying.

Then one day, a giant meteorite struck the earth, and the dinosaurs all disappeared.

DINOSAUR:

Whazzat? Did you say something?

DINOSAUR #2:

No.

DINOSAUR:

I could swear you said "giant meteorite."

ANNCR:

To this day, nobody knows for sure what really happened...
